

## Sensors for High Demand Process & Industrial Level Switches

EBE's CorTEC® LCRB level sensors offer outstanding performance for process and industrial level measurement. The small PCB-based level sensors enable the design of rugged and highly reliable level switches. Application media is almost unlimited and includes dry powders as well as other solids, oil, conductive liquids, detergents and even highly viscous media like honey or cream.

### Technical Specifications

- Compact design suitable for various casings and even smallest housings
- Excellent sensitivity and accuracy even with media of the lowest dielectric constants (even  $\epsilon_r < 2$ )
- High electromagnetic compatibility available for different industries
- CorTEC® sensors offer autocalibration and are immune to almost any interference and compensate artifacts
- Unlimited customization options for OEM-customers
