

NEW PRODUCT

QCRC FLUID QUALITY SENSOR

With the new sensor generation QCRC, EBE extends its quality sensors by a particularly compact and powerful solution for the non-contact detection of fluid properties for OEM and IoT applications. The sensors enable a complete media detection through container or tube walls – without any contact with the medium.

ebe.de

- Fluid quality & fluid property measurement by EBE's proprietary corTEC® sensor technology
- Measurement offers capacitive and conductive values
- Media detection through tank walls and tubes
- Excellent sensitivity and repeatability even with media of the lowest dielectric constants (even $\epsilon_r < 2$)
- Fully integrated electrodes
- Miniature size with only 30x30mm
- Easy communication with I2C
- Evaluation Kit for direct testing at the end application
