

## CESI - HALL-Encoder for various Applications

The CESI panel encoder from EBE is a high-precision signal generation solution for your HMI, offering wear-free operation through the use of a magnetic sensor. Its adaptability allows for a wide range of HMI applications. The range of options includes simple encoders with 16 detents and plastic shaft, as well as handwheels with 24 detents, stainless steel shaft and metal knob.

### Technical Specifications

- Wear-free signal generation by magnetic sensor
- Mechanical push button
- 16, 24, or 32 impulses with an A-B track signal and a push button
- Central mounting M10 x 0.75
- Long-life design
- $\varnothing$  6 mm stainless steel or plastic shaft
- Shaft and panel seal for IP protection available
- Cable or PIN-header connector
- Suitable for a variety of industries
- Different types of detent force available
- VCC: 5V DC or 24V DC
